

The Presto-Scan™ System

Digital Footprint Analyzer

Quickly and easily measure foot pressure distribution during walking or standing with the Presto-Scan system. Educate customers about their foot type and the appropriate footwear to optimize function and comfort. Make recommendations for appropriate footwear, insoles, or orthotics using objective data.

Measure foot pressure distribution while walking or standing with the Presto-Scan.

Presto-Scan helps you focus on serving your customers by providing a simple user interface at an affordable price. See how Presto-Scan can help you...

Engage your customers

- Provide customers with a printout of their pressure profiles and purchasing choices
- Display instant, visual results at the touch of a button
- Capture customers' attention with high-tech foot pressure mapping displays

Increase customer satisfaction

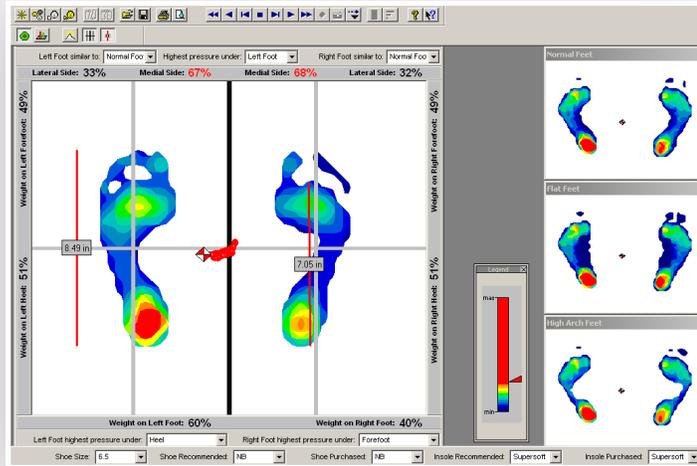

- Identify the foot type, foot function and weight distribution of your customer
- Recommend appropriate foot wear, insoles or orthotics based on objective data
- Pinpoint problem areas instantly

Differentiate yourself from the competition

- Personalize the system with your logo on the platform, screen saver, start screen and printouts for a lasting impression
- Store customer information on foot type and footwear preferences to provide superior customer service, deliver targeted marketing campaigns and sales follow-ups

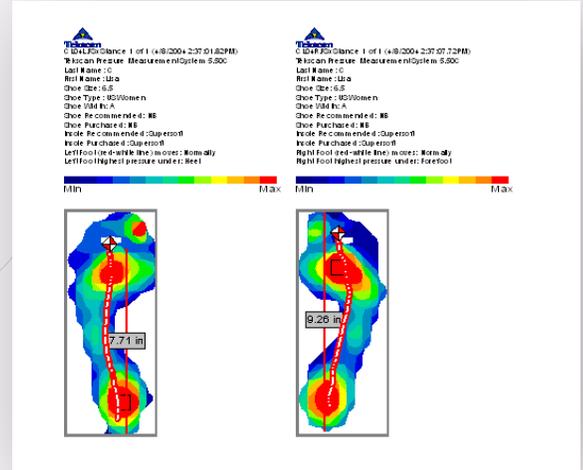

Presto-Scan Analysis

Presto-Scan Software

Easily locate areas of high pressure

Print Report

Provide customers a report with information on their balance and walking tests.

Client Database

The client database tracks your customers and their needs. By maintaining the database, you have the ability to:

- Analyze customer purchasing history
- Create targeted marketing campaigns based on data
- Provide higher quality service to your customers

The 'Client Record - Lisa M' form contains the following information:

- Patient Information:** FIRST NAME: Lisa, Middle Name: M, LAST NAME: Lisa
- Shoe Information:** Shoe Size: 8, Shoe Measurement Type: US Women, Shoe Width: A, Arch Size: 7, Date of Birth: 12/9/1912
